SUMMARY

Full-stack developer with 5+ years of experience building web applications and REST APIs with C#/.NET and Angular. Experienced across the full .NET evolution, from .NET Core 3.1 to .NET 10, applying Clean Architecture, CQRS and SOLID principles. Builds high-volume data pipelines that process files of up to 50 million lines, and ships full-stack products to production. Strong SQL Server background, from stored procedures to reporting, plus hands-on work with Azure, messaging (RabbitMQ, Azure Service Bus), Docker and CI/CD. Postgraduate degree in .NET Software Architecture. Brings years of ERP experience (TOTVS Protheus) in finance, billing and inventory, which helps translate business rules into reliable software.

TECHNICAL SKILLS

Back end: C#, .NET (Core 3.1 to .NET 10), ASP.NET Core, ASP.NET MVC, Entity Framework Core, MediatR, REST APIs

Front end: Angular (15+), AngularJS, TypeScript, JavaScript, HTML, CSS, Bootstrap, Angular Material

Databases: SQL Server (T-SQL, stored procedures, reporting)

Cloud & DevOps: Azure (Functions, Blob Storage), GCP (basic), Docker, CI/CD

Messaging: RabbitMQ, Azure Service Bus

Architecture: Clean Architecture, Hexagonal, Modular Monolith, Microservices, CQRS, Repository and Unit of Work patterns, SOLID

Quality & Process: Unit testing, TDD, caching and resilience patterns, Agile / Scrum

Business systems: TOTVS Protheus ERP (Accounting, Fixed Assets, Purchasing, Inventory, Billing, Finance), DMS

PROFESSIONAL EXPERIENCE

Full-Stack Developer
Oct 2024 – Present

Codecycle — Remote

- Develop web applications and REST APIs with C#/.NET on the back end and AngularJS on the front end.
- Build and maintain a pipeline of .NET console applications that processes about 50 TXT/CSV files per day, each with 2 to 50 million lines.
- Multi-stage design: the first stage splits very large files into smaller chunks so downstream applications can read and process them in parallel (multiprocessing).
- Write SQL Server scripts and stored procedures supporting application features and data processing.

Systems Analyst & .NET Developer
Dec 2023 – Aug 2026

Grupo Rivema — Rio Verde, Brazil

- Developed web solutions and APIs in .NET following SOLID and Clean Architecture, with Angular front ends.
- Supported, configured and fixed the TOTVS Protheus ERP for a group of 5 companies (about 100 employees) across Management Accounting, Fixed Assets, Purchasing, Inventory, Billing and Finance, plus DMS modules (Auto Parts, Vehicles and Service Shop).
- Built business reports with SQL Server for all 5 companies.
- Managed and monitored servers and IT infrastructure for the whole group.

Systems Analyst & .NET Developer
Apr 2021 – Dec 2023

Hospital Presbiteriano Dr. Gordon — Rio Verde, Brazil

- Developed APIs and web solutions in .NET using SOLID and layered Clean Architecture in an Agile Scrum team.
- Analyzed and monitored the TOTVS ERP, fixing errors and bugs through configuration and direct database corrections.
- Created SQL Server reports delivered through the ERP's reporting templates and through web applications.

PROJECTS

Financial – Multi-company Financial & Operations ERP

Jan 2023 – Present

Own product • Back end + front end • In production

.NET 10 • Angular 18 • Azure

- ERP built to serve multiple businesses; in production at its first client, a trucking company, with 7 active users and a design that scales with each client's headcount.
- Covers accounts payable and receivable, banking, invoicing, service orders, driver commissions and payroll, grain freight contracts and customer advances.
- Back end in .NET 10 with Clean Architecture and CQRS (MediatR), EF Core and SQL Server, Unit of Work transactions, soft delete with global query filters and multi-company data isolation.
- Security with JWT in HttpOnly cookies, dynamic permission-based authorization policies, rate limiting and CORS.
- Azure Functions for hourly e-invoice (NF-e) import and daily bank balance snapshots; Azure Blob Storage for files.
- Integrations with an electronic invoicing API (Focus NFe) and company registry lookup; PDF reports with QuestPDF and Excel export.
- Front end in Angular 18 with standalone components, Angular Material and Bootstrap 5, including responsive report pages that work on mobile and desktop.
- Spec-first workflow: each feature is documented and approved before implementation, using AI-assisted development.

EDUCATION

Postgraduate Degree in .NET Software Architecture

Apr 2024 – Apr 2025

Faculdade Anhanguera

Online

ASP.NET Core & .NET Expert Program

Apr 2023 – Apr 2024

LD Treinamentos

Online

- API development, SOLID, CQRS, Repository pattern, Clean and Hexagonal Architecture, Modular Monoliths, Microservices, TDD, caching and resilience.

B.S. in Information Systems

Jan 2011 – Feb 2015

State University of Goiás (UEG)

Santa Helena de Goiás, Brazil
